CPARS

Contractor Performance Assessment Reporting System

410th COR Training

Learning Objectives

- **What is CPARS**
- **CPARS Access/Training**
- **Regulatory Requirements**
- **Reporting Thresholds**
- **Reporting Frequency**

410th COR Training

CPARS

- Contractor Performance Assessment Reporting System (CPARS) provides a centralized data repository of contractor performance information

- CPARS ensures that accurate data on contractor performance is current and available for use in source selections

Contractor Performance Assessment Reporting System (CPARS)
A Department Of Defense (DoD) PKI Certificate is required for all DoD employees accessing CPARS, ACASS, and CCASS. Contractors are also encouraged to obtain and use a certificate. Non-DoD Government users may continue to access CPARS, ACASS, and CCASS without a certificate.<more info>
CPARS is a web-enabled application that collects and manages the library of automated CPARs. CPARS is for UNCLASSIFIED use only. Classified information is not to be entered into this system. A CPAR assesses a contractor's performance and provides a record, both positive and negative, on a given contractor during a specific period of time. Each assessment is based on objective facts and supported by program and contract management data, such as cost performance reports, customer comments, quality reviews, technical interchange meetings, financial solvency assessments, construction/production management reviews, contractor operations reviews, functional performance evaluations, and earned contract incentives.
